

THE FINTECH REVOLUTION: CRYPTO CURRENCIES, BLOCKCHAIN, DLTS & APPLICATIONS

COURSE OVERVIEW

Bitcoin & crypto currencies have captured the attention of the public and regulators around the globe. The supporting technology, Blockchain, has been called the biggest technology development since the internet. With great potential to disrupt the financial services industry there is a drive to understand what this technology is and how it can be used to save costs, prevent fraud, enhance the client experience and increase revenues for the industry.

This programme will look at the history and principles of the Blockchain as well as the feasibility of this technology within the banking and financial services industry. Further areas of focus will be on the current trends in regulation of ICOs, trading of crypto currency and uses of DLTs.
