

Getting Ahead on AI & Generative AI

INTUITION - AI CAPABILITIES

THE CHALLENGE

"AI is going to transform the world. Yet, where do we start."

"Our mission is to help our clients explore its potential and its practical applications."

"Leading to meaningful productivity improvements, across all business functions."

"Balancing these concerns is how to manage emerging risks and provide reassurance to stakeholders."

"Our aim is to help organizations create sustainable trusted competitive advantage through explainable AI."

THE SOLUTION

Our AI faculty are leading practitioners working with governments and businesses across a wide range of sectors. They have over 50 years of Digital Transformation experience. To help your organization harness AI, Intuition offers a range of tailored learning programs:

AI Essentials – Executive Briefings & Webinar Series:

Overview: Provide senior decision-makers, and specialists with fundamental AI concepts.

Format: One general webinar followed by five interactive sessions for smaller groups (up to 25 participants).

AI Champions Program:

Overview: 4-6 months program for 10-15 selected individuals, combining training, consultancy, and coaching.

Format: Participants will work on AI projects, becoming internal AI experts.

Generative AI Workshop:

Overview: A half-day session for digital teams, introducing them to generative AI and its applications.

Format: Serves as a foundation for further AI initiatives.
